

Fueling¹ a clean future

¹*Fueling* — powering business jets with sustainable aviation fuel (SAF) to reduce the industry's carbon footprint.
Safe. Clean. Responsible.

From our people to our
processes, Jet Aviation
makes decisions
that help shape
sustainable outcomes
for our businesses, the
communities we serve,
and our employees —
the artisans of aviation.

¹ *Sustainable* — overcoming environmental challenges to
meet the needs of today, and those of the future.

Sustainable Aviation Fuel (SAF)

Jet Aviation is committed to supporting efforts to reduce our industry's carbon footprint. Made from renewable waste and raw material residue, SAF is a wholly sustainable aviation fuel that is blended with traditional jet fuel and then re-certified as Jet A1 fuel. SAF represents the single-most potential to reduce aviation's greenhouse gas emissions, with an up to 80% reduction over its lifecycle.

SAF requires no modifications and has the same technical and safety requirements as fossil-based jet fuel.

Uplift SAF today

Jet Aviation's goal is to provide business aviation owners and operators opportunities to contribute to sustainable aviation in a meaningful way. We are pleased to offer on-site SAF fueling at our FBO locations in Amsterdam, The Netherlands, and Van Nuys, California.

To order, please contact your regional FBO sales team:

Book & Claim

The main challenge with sustainable aviation fuel (SAF) is that current supply is far below what demand for aviation requires. Book & Claim broadens access to SAF while avoiding the need to physically transport it. This in turn promotes greater awareness and acceptance of SAF, ultimately supporting more production and availability for a cleaner future.

Book & Claim benefits

For customers traveling through facilities where SAF is not physically available, or simply wanting to support SAF, we offer all the benefits of SAF fueling through our Book & Claim service. After booking or placing an order for SAF, the volume is tracked and verified and a certificate of credit for the carbon reduction is then issued. This ensures the environmental benefits are properly accounted for, including avoidance of unnecessary transportation costs.

SAF through Book & Claim is available at all Jet Aviation locations. Contact us today to learn more.
